I made this game to experience what it's like to be a game developer, to confront new things with passion, and to be capable of meeting your goals. To that end, I partnered with a group of people who are as confident as I am, and we began development. Additionally, we have received a lot of criticism, as well as a lot of support and encouragement. I am filled with zeal when I see the excitement that this game has brought out in people, and I also feel that it's my duty to work hard to achieve our goals.
